

Design and Multimedia Arts Program of Study: Audio/Video Production

Plan, direct, and produce multimedia projects in audio and video production. Explore career opportunities and develop technical skills needed to work in the radio, TV, and film industries.

RECOMMENDED COURSE SEQUENCE

Principles of Audio/Video Production (1 credit) (9th - 10th Grade)

Obtain the introductory skills of audio/video production through team and individual projects. Improve your knowledge and skills in communication, interpersonal interactions, and professional presentation.

Audio/Video Production 1 and Lab (HCTC) (2 credits) (10th - 11th Grade)

Practice using technology to create and manage professional-level video presentations. Analyze and apply the production process to a variety of media projects. Develop an understanding of pre-production planning, production, and post-production with an emphasis on short documentaries and exercises as the basis for mastery.

Video Production 2 and Lab*

(HCTC) (2 credits) (12th Grade)

Advance technical skill competencies related to the production process through continued analysis and application of pre-production planning, production, and post-production. Students expand project capabilities as they apply creative concepts while working as a member of a production team.

Digital Audo Tech 1 and 2* (HCTC) (2 credits) (12th Grade)

(HCIC) (2 credits) (12th Grade) Collaborate with your peers to produce radio, TV, and film broadcasts with a focus on audio production. Explore a variety of team member roles through project-based learning. Develop interpersonal skills needed for a successful career in broadcasting through real-world interactions with clients seeking audio

productions. Enhance leadership skills through a variety of project-based experiences designed to familiarize students
